Pure Bamboo Water

a great raw material
for your drink!

naturally hydrating

fresh

wild

„The hidden secret of distinctive aromatic bamboo water is our wild bamboo forest, where millions of bamboos are connecting into a giant organism by bamboo roots.

Bamboo accumulates the power from the sunlight and the earth to grow, instead of being superseded by spent flowers; they vanish into the sky to be replaced by new and larger culms.

Our bamboo forest on Wuyi mountain in south-eastern China is certified organic by EcoCert. We can provide the optimal fresh bamboo water all year round.

Every single drop of bamboo water culminates spirit of bamboo, the uniqueness of its living environment, and our great passion on this amazing plant.“

Christian Gerig Co-Founder at Organic Bamboo Industries Ltd.
