Bamboo Leaf Extract
powerful ingredient for your drink
The hidden secret of the distinctive aromatic bamboo extract is our wild bamboo forest, where millions of bamboos are connecting into a giant organism by their roots. Bamboo accumulates the power from the sunlight and the earth to grow.

Organic Bamboo Industries Ltd. is the world leading producer of fresh Bamboo Leaf Extract.

Most bamboo species are a rich source of flavonoids which are well known for many beneficial physiological effects such as anti-inflammatory, anti-allergic, anti-bacterial and anti-aging properties and as prevention against cardiovascular diseases.

Bamboo Leaf Extract exhibits both high total and high individual flavonoid levels. 20-50mg/100g
Silica is one of the most important constituents in connective tissues such as tendons, skin and aorta where it plays a key role in elasticity, integrity and firmness. Only water soluble silica – like bamboo silica – can be absorbed by the human body. Main source for silica is drinking water and plant-based food. However, municipal purified water in modern society contains very little silica. Only 4-20mg/L. There is 80-120 mg/l soluble silica in our Bamboo Leaf Extract.
